IDI Enhances Presence in Asian Market

SHANGHAI, CHINA – IDI Composites International, the premier global formulator and manufacturer of thermoset molding compounds, has expanded its presence in Asia to better serve the growing manufacturing needs of that region. The company has established plant locations in Shanghai

and Shenzhen, making it the only thermoset molding compound manufacturer with two manufacturing facilities in Asia.

The expansion reflects the commitment of IDI to better serve its expanding customer base in Asia amidst the increasing demand of thermoset molding compounds around the globe.

Operating dual Asian facilities will have two benefits—preservation of material shelf life and an enhanced level of customer service. Molding compounds will be manufactured locally and delivered more quickly, allowing IDI to keep pace with the demands of its molding customers. In addition, IDI will offer engineering support from both facilities, creating greater geographic coverage in serving its customers. As an added benefit, custom formulations produced by IDI in Asia are transferable to its manufacturing facilities in Europe and The Americas.

About IDI Composites International: IDI Composites International is the premier global formulator and manufacturer of thermoset molding compounds for custom molders and OEMs. The company provides customized polyester/vinylester-based bulk molding compounds (BMC) and sheet molding compounds (SMC) for the world's most demanding markets, including automotive, electrical, transportation, telecommunications, and military/aerospace.

Headquartered in a 200,000 square foot facility in Noblesville, IN (USA), IDI has a strong presence in the international thermoset composites market. To support a growing customer base world-wide, the company operates multiple wholly-owned manufacturing facilities in Europe, Asia, and The Americas.
