

IDI Corporate Profile

IDI Composites International (IDI) is the premier global formulator and manufacturer of thermoset molding compounds for custom molders and OEMs. The company provides customized polyester/vinylester-based bulk molding compounds (BMC) and sheet molding compounds (SMC) for the world's most demanding markets, including automotive, electrical, appliance, food service, and energy.

IDI-engineered molded products are lightweight and exceptionally strong, exhibiting better strength-weight ratios than most metals. They are also corrosion-resistant, creep resistant, and exhibit excellent thermal properties compared to engineered thermoplastic-based products.

With more than 35 years of experience, IDI works closely with customers to identify the optimal thermoset molding compound for each application. The company has substantial R&D resources, plus excellent chemical engineering, ISO-certified manufacturing, and comprehensive quality control.

Headquartered in a 200,000 square foot facility in Noblesville, IN (USA), IDI has a strong presence in the international thermoset composites market. To support a growing customer base world-wide, the company operates multiple manufacturing facilities in Europe, Asia, and The Americas.
