IDI Opens New Manufacturing Facility in UK

WEST MIDLANDS, UK – IDI

Composites International, the premier global formulator and manufacturer of thermoset molding compounds, has opened a new manufacturing facility in the Birmingham area of England. The new facility allows IDI to better serve its growing customer base in Europe amid the increasing global demand for thermoset molding compounds.

The new IDI manufacturing facility will produce both bulk molding compound (BMC) and sheet molding compound (SMC). With additional production facilities located in Noblesville, IN (USA); Shanghai, China; Shenzhen, China; and Aguirre, Puerto Rico; the company is ideally positioned to provide its customers with the highest quality products and services regardless of location.

“With the global demands for thermoset materials increasing annually, it is important for us to expand our capabilities,” says Peter Garland, General Manager of the UK facility. “The new facility allows us to better serve our customers in this critical geographic market.”

About IDI Composites International: IDI Composites International is the premier global formulator and manufacturer of thermoset molding compounds for custom molders and OEMs. The company provides customized polyester/vinylester-based bulk molding compounds (BMC) and sheet molding compounds (SMC) for the world's most demanding markets, including automotive, electrical, transportation, telecommunications, and military/aerospace.

Headquartered in a 200,000 square foot facility in Noblesville, IN (USA), IDI has a strong presence in the international thermoset composites market. To support a growing customer base world-wide, the company operates multiple wholly-owned manufacturing facilities in Europe, Asia, and The Americas.
