IDI Receives Fourth ISO 14001: 2004 Environmental Responsibility Certification

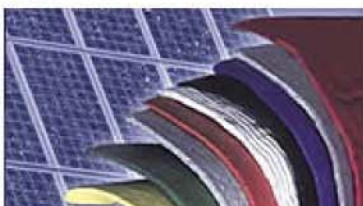

IDI recently received ISO 14001:2004 certification for environmental responsibility at its Lemont, IL location, making it the fourth plant to receive this certification. IDI is working to minimize negative effects on the environment and increase operating efficiency, all as part of

IDI's commitment to operating environmentally-friendly facilities. [Click here](#) for more information on IDI's ISO certification.

IDI Announces E-200 Series Thermoset Composites for Use in Alternate Energy Market

The E-200 Series has superior resistance to corrosion, UV deterioration, and various contaminants, making it ideal for use in alternate energy applications that undergo frequent exposure to sun, heat, moisture, and other natural elements. [Click here](#) for more information.

Nick Justice, Son of IDI Composites' Systems Analyst, Denny Justice, Wins 2008 Merrell Scholarship

IDI is proud to announce that Nick Justice is the 2008 recipient of the Merrell Scholarship to Purdue University. The fund was established a decade ago in honor of IDI's founder John K. Merrell and his wife, Verna. [Click here](#) to read more.

IDI Supplies BMC to The Vollrath Company for Food Service Displays

IDI has been selected by The Vollrath Company for its Miramar™ Templates. These templates are inserted in the openings in stations that display hot and cold foods in buffet tables and cafeterias. IDI's materials have excellent insulative and corrosion-resistant properties and also offer molded-in color, making them ideal for use in the food service industry. Please [click here](#) to learn more about this application.

IDI Offers Low Smoke, Low Toxicity Composite for Global Rapid Transit Market

IDI offers 46-16-60, a low-toxicity, low-smoke, and low-flammability SMC that meets the most stringent standards of the Rapid Transit industry. The lightweight material offers superior electrical insulation and heat resistance, allowing it to

withstand prolonged exposure to the elevated temperatures and high voltage common in electrical applications in the global Rapid Transit market. Please [click here](#) to learn more.
