Acquisition Expands Global Presence

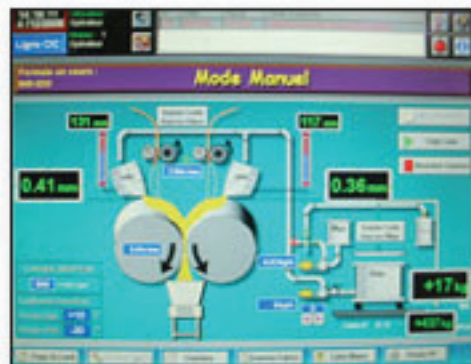

With the acquisition of the former Menzolit Compounds International manufacturing facilities in Vineuil, France and Shanghai, China, IDI Composites International is now the largest supplier of thermoset molding compounds in the world. IDI Europe's products and strategic manufacturing locations in France and the U.K. also enhance IDI's presence and position in the global electronic, transportation, appliance, lighting, medical, building, and other markets.

CIC (Continuous Impregnated Compound) Enhances Product Line

IDI's reputation as the premier global formulator and manufacturer of bulk and sheet thermoset molding compound (BMC and SMC) is further enhanced with the addition of the Continuous Impregnated Compound (CIC) products of IDI Europe. While similar to BMC in appearance and application, CIC is unique because of the longer glass fibers that are impregnated into the compound.

IDI Europe Stresses Quality, Safety, and the Environment

IDI Composites International (Europe) maintains the same high standards for quality, safety, and environmental responsibility as IDI's other manufacturing operations. IDI Europe plants have achieved ISO 9001: 2008, ISO/TS 16949: 2002, ISO 14001: 2004, and OHSAS 18001: 2007 certification. Continuous improvement programs are in place at all IDI Europe manufacturing locations.
